- Who can possibly forget Sly & The Family Stone performing "I Want To Take You Higher" in the movie Woodstock ... they just about stole the show.
- The band zoomed out of flower power, zonked out, trippy San Francisco in the late 60's with a whole new bag ... they were socially conscious, one of the first racially mixed bands, they had a message of love, harmony and grooviness ... & Psychedelic Funk ... literally there was no one else anything like them.
- No 1 singles & albums followed into the early 70's ... after which reported drug problems slowed their momentum.
- This recording, which reached #152 on the Billboard charts on its release in 1979 was an attempt to recapture those dizzy heights the band had once enjoyed in the music world ... and although was not to be ... this obscure recording still contains all the great grooves which are a hallmark of this great band.
- Sly Stone is one of America's most influential musicians having influenced the whole George Clinton Parliament / Funkadelic Music Scene.
